

# Software implementation:

the good, the bad, the reality

Estes Park • Fort Collins • Longmont • Loveland

Sarah Stanton Johnson

Energy solutions program manager

Reimagine tomorrow.

Luke Klasinski

Senior engagement manager

# Agenda

- The good
  - What has improved?
  - Priorities met
- The bad
  - Do you have the time?
  - It not going to work the same
- The reality
  - Getting to go-live
  - Life after go-live

# Relationship

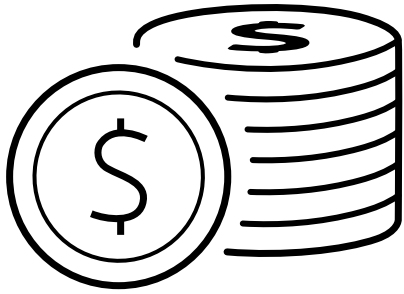

- The better you both understand each others goals up front the smoother implementation will go.
  - Learn each others' language
  - Concentrate on goals and lean on processes

# The good

We were able to accomplish several goals.

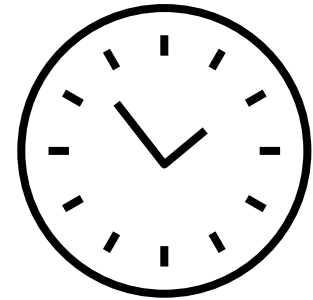

# The bad

Change

takes

time

# The reality

## Reality for go-live

- Block out larger chunks of time
- Think about reporting as you build
- Have several different people work on testing

## Reality now

- Faster application processing time
- System that can handle our data needs
- Removed duplicate data entry and moved to correct person

# Thank you
